Subject: Submission of Written Responses for the Record to Questions Raised During the June 18 SFRC Hearing on the Israeli Attack on Iraqi Nuclear Facilities

S/S-S Action Officers: James B. Lane, X28338
Angel Rabasa, X21522

Attached is a list of items which we agreed to provide for the record during the hearing. Relevant pages from the transcript, which addressee bureaus have received separately, are attached for reference.

Please prepare responses and clear with other participating bureaus and S/P. The final paper should be prepared in an original and one copy on one side of the page and should bear the date of the hearing, page and line number in the upper right hand corner of each insert. Drafting and clearing information for each should be placed on a separate sheet of paper.

As with the HFAC submissions, classified responses should be bracketed in red.

The material needs to be delivered to the Committee on Monday, July 6. Final papers are due in S/S-S no later than noon, July 6.

natural uranium power reactor, a research reactor,

research facility on uranium enrichment and certain work on

reprocessing facilities.

There is -- I will have to check the details of the

[illegible]

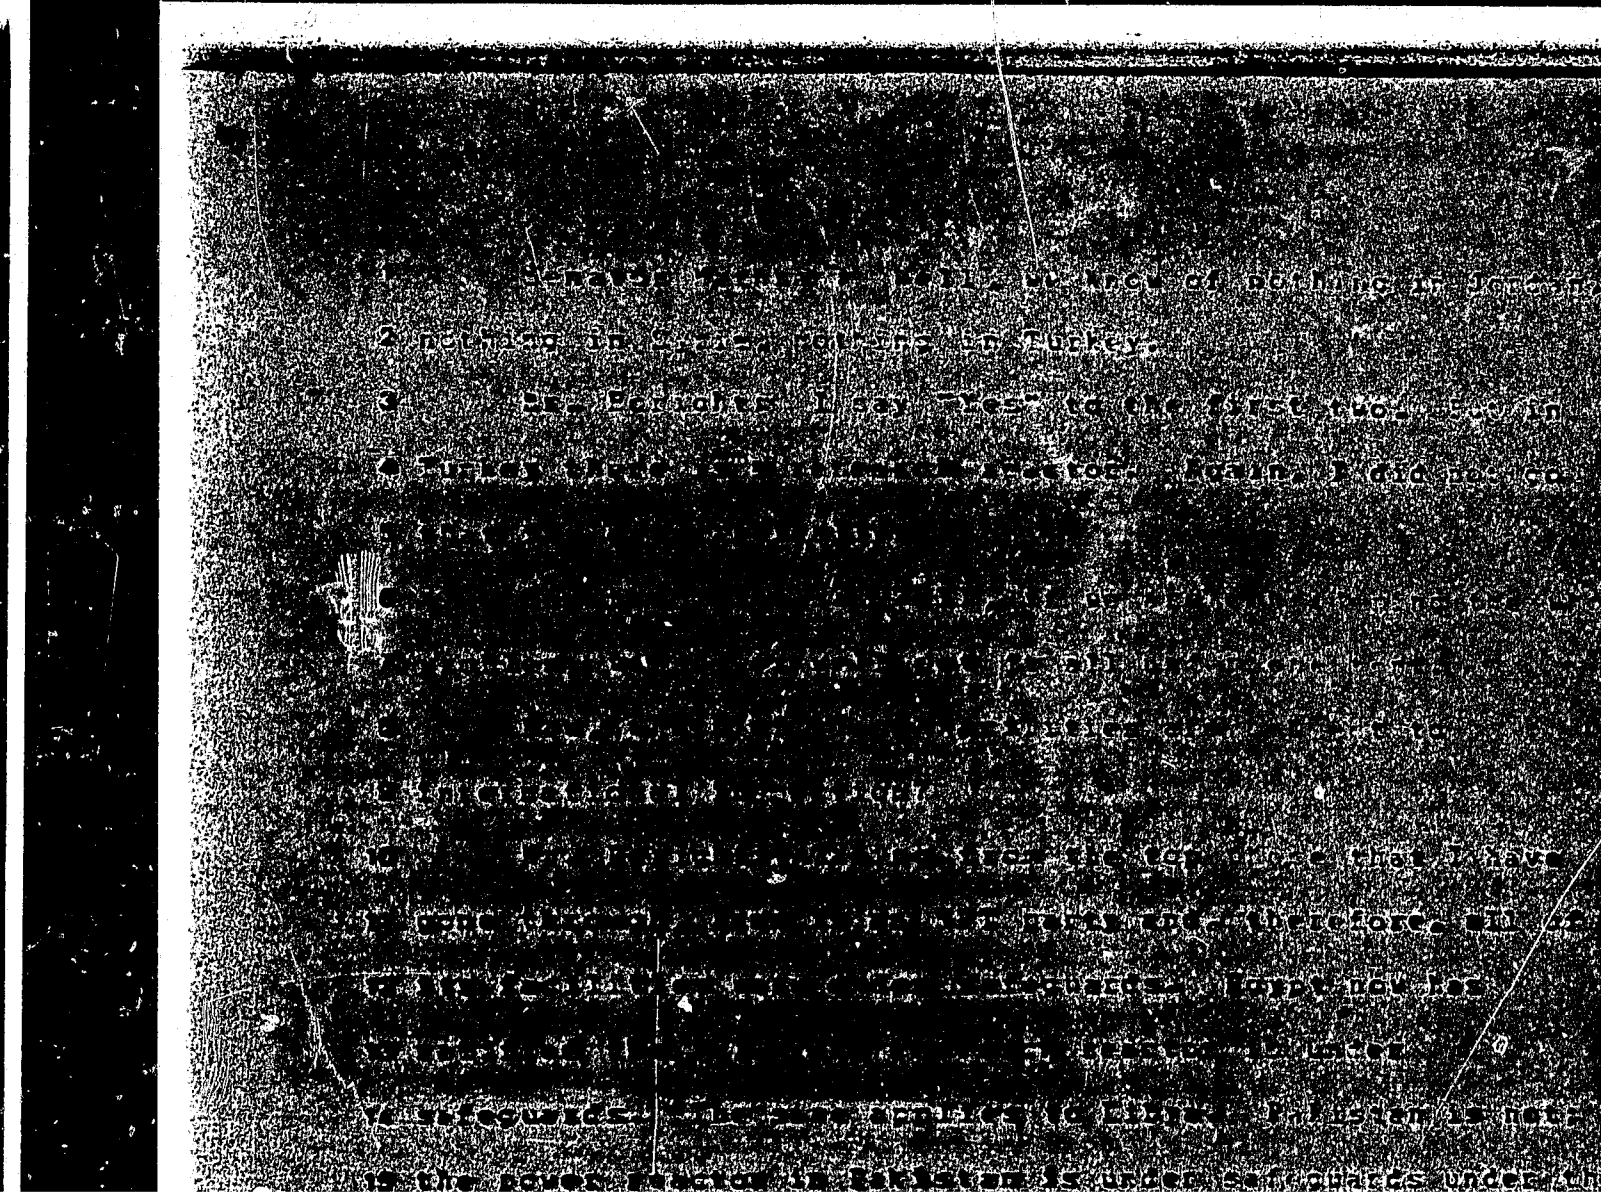
The Government

Under Article [illegible]

the Government [illegible]

that -- but that is [illegible]

[END OF INSERT]



Let me follow up on that just a little bit. Can you give us an estimate of the highly enriched uranium ore of plutchrum that may be in Iran?

Mr. Knight. I should follow this up with a detailed answer. It is not a sensitive question. It is just that I should check it factually.

There should be essentially no plutonium in Iran.

There is [illegible] production of some of the [illegible]

[illegible] reactor has HEU. Although it is a lesser [illegible] and a lesser [illegible] than [illegible] in Iraq.

I need to review the precise details.

[COMMITTEE INSERT]

assistance program with Israel that is quite a substantial magnitude, and there are other items, communications pieces of equipment, ground items of equipment.

With respect to aircraft, to the best of my knowledge, there are no other currently [illegible]

Senator Glenn: As far as other equipment, as it [illegible] up?

Mr. McFarlane: The decision has not been taken [illegible] this time.

Senator Glenn: And other equipment is continuing to flow to Israel?

Mr. McFarlane: There has been no decision to foreclose it.

Senator Glenn: Well, then, it continues to flow; is that correct?

Mr. McFarlane: Well, I say that because, quite honestly, I do not know what today and tomorrow and the next day is or is not due. But there has been no effort to cut that off.

Senator Glenn: At the time the F-16 decision was made to [illegible] it up, there was no decision made to hold up

[illegible] and better definition of what that [illegible]

Mr. Reiciano: I would be glad to provide [illegible]

record.

[illegible]

Libyan. My understanding is that Libya has a research reactor, called Tajura, a five-megawatt research reactor, called Tajura, I understand that it was supplied by the Soviet Union, but it is nearing completion of construction and that the Soviets have sent it [illegible] kilograms of highly enriched uranium fuel [illegible]

[illegible] If I recall correctly, you said earlier that

Dr. Kozlowski, I corrected or [illegible] the books. That number is me. I thought that in this case, which I recall, at least 80 percent and not 90. But I would have to check that.

Senator Bingaman, I see.

Senator Inhofe, if Saddam Hussein would yield--

Senator Graham, I yield.

Senator Inhofe, I was part of our conferences in the caucuses that I was told that such further deliveries would be supplied [illegible] I'm not sure that is the case to hold the witnesses to too high a degree of detail at this point.

Senator Graham, Certainly.

Senator Inhofe, I'm a follow-up to the Senator

answer to that.

Senator Graham, I have been aware of that e-e

figure.

[COMMITTEE INSERT]

Mr. Peterson, you could be glad to supply that for the

record.
